ARG22885 anti-CD90.2 / Thy 1.2 antibody [F7D5]

Package: 100 μg Store at: -20°C

### **Summary**

Product Description Mouse Monoclonal antibody [F7D5] recognizes CD90.2 / Thy 1.2

Tested Reactivity Ms
Tested Application FACS

Specificity The clone F7D5 recognizes the mouse Thy1.2 alloantigen, also known as CD90.2, which is expressed by

thymocytes and peripheral T lymphocytes. Clone F7D5 reacts with Thy1.2 mice such as CBA and

BALB/C, but not with Thy1.1 mice eg. AKR and FUB.

Host Mouse

Clonality Monoclonal

Clone F7D5 Isotype IgM

Target Name CD90.2 / Thy 1.2

Species Mouse

Conjugation Un-conjugated

Alternate Names Thy-1 membrane glycoprotein; Thy-1 antigen; CD antigen CD90; CDw90; CD90

## **Application Instructions**

Application table	Application	Dilution
	FACS	Neat
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

## **Properties**

Form Liquid

Purification Purified by ammonium sulfate precipitation

Buffer PBS and 0.09% Sodium azide

Preservative 0.09% Sodium azide

Concentration 1 mg/ml

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed

before use.

Note For laboratory research only, not for drug, diagnostic or other use.

## Bioinformation

Gene Symbol Thy1

Gene Full Name thymus cell antigen 1, theta

Background This gene encodes a cell surface glycoprotein and member of the immunoglobulin superfamily of

proteins. The encoded protein is involved in cell adhesion and cell communication in numerous cell types, but particularly in cells of the immune and nervous systems. The encoded protein is widely used

as a marker for hematopoietic stem cells. This gene may function as a tumor suppressor in

nasopharyngeal carcinoma. Alternative splicing results in multiple transcript variants. [provided by

RefSeq, Jul 2015]

Function May play a role in cell-cell or cell-ligand interactions during synaptogenesis and other events in the

brain. [UniProt]

Calculated Mw 18 kDa
