

## Product datasheet

info@arigobio.com

# ARG51154 anti-eNOS antibody

Package: 100 μl, 50 μl Store at: -20°C

### Summary

Isotype

Product Description Rabbit Polyclonal antibody recognizes eNOS

IgG

Tested Reactivity Hu, Ms, Rat

Tested Application ICC/IF, WB

Host Rabbit

Clonality Polyclonal

Target Name eNOS

Species Human

Immunogen Peptide sequence around aa.1175~1179 (T-Q-S-F-S) derived from Human eNOS.

Conjugation Un-conjugated

Alternate Names Constitutive NOS; NOS type III; Nitric oxide synthase, endothelial; Endothelial NOS; eNOS; EC-NOS;

NOSIII; cNOS; EC 1.14.13.39; ECNOS

## **Application Instructions**

Application table	Application	Dilution
	ICC/IF	1:100 - 1:200
	WB	1:500 - 1:1000
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

## **Properties**

Form Liquid

Purification Antibodies were produced by immunizing rabbits with KLH-conjugated synthetic peptide. Antibodies

were purified by affinity-chromatography using epitope-specific peptide.

Buffer PBS (without Mg2+ and Ca2+, pH 7.4), 150mM NaCl, 0.02% Sodium azide and 50% Glycerol.

Preservative 0.02% Sodium azide

Stabilizer 50% Glycerol

Concentration 1 mg/ml

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.

Note For laboratory research only, not for drug, diagnostic or other use.

#### Bioinformation

Gene Symbol NOS3

Gene Full Name nitric oxide synthase 3 (endothelial cell)

Background Produces nitric oxide (NO) which is implicated in vascular smooth muscle relaxation through a cGMP-

mediated signal transduction pathway. NO mediates vascular endothelial growth factor (VEGF)-induced angiogenesis in coronary vessels and promotes blood clotting through the activation of platelets. Produces nitric oxide (NO) which is implicated in vascular smooth muscle relaxation through a cGMP-

mediated signal transduction pathway. NO mediates vascular endothelial growth factor (VEGF)-induced angiogenesis in coronary vessels and promotes blood clotting through the activation of platelets.

Isoform eNOS13C: Lacks eNOS activity, dominant-negative form that may down-regulate eNOS activity by

forming heterodimers with isoform 1. [UniProt]

Research Area Cancer antibody; Cell Biology and Cellular Response antibody; Metabolism antibody; Neuroscience

antibody

Calculated Mw 133 kDa

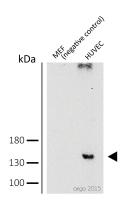

PTM Phosphorylation by AMPK at Ser-1177 in the presence of Ca(2+)-calmodulin (CaM) activates activity. In

absence of Ca(2+)-calmodulin, AMPK also phosphorylates Thr-495, resulting in inhibition of activity (By

similarity). Phosphorylation of Ser-114 by CDK5 reduces activity.

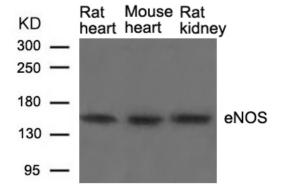

## **Images**

Function

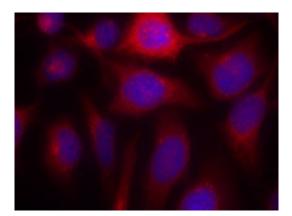

#### ARG51154 anti-eNOS antibody WB image

Western blot: 30  $\mu g$  of MEF (negative control) and HUVEC cell line lysates stained with ARG51154 anti-eNOS antibody at 1:500 dilution.

## ARG51154 anti-eNOS antibody WB image

Western Blot: extracts from Rat heart, Mouse heart and Rat kidney tissue stained with anti-eNOS antibody ARG51154.

## ARG51154 anti-eNOS antibody ICC/IF image

 $Immun of luorescence: methan ol-fixed \ HeLa \ cells \ stained \ with \ anti-eNOS \ antibody \ ARG 51154.$
