# ARG56812 anti-Midkine antibody (Biotin)

Package: 50 μg Store at: 4°C

#### **Summary**

Product Description Biotin-conjugated Rabbit Polyclonal antibody recognizes Midkine

Tested Reactivity Hu

Tested Application ELISA, WB

Host Rabbit

Clonality Polyclonal

Isotype IgG

Target Name Midkine

Species Human

Immunogen E.coli derived Recombinant Human Midkine.

(VAKKKDKVKK GGPGSECAEW AWGPCTPSSK DCGVGFREGT CGAQTQRIRC RVPCNWKKEF GADCKYKFEN

WGACDGGTGT KVRQGTLKKA RYNAQCQETI RVTKPCTPKT KAKAKAKKGK GKD)

Conjugation Biotin

Alternate Names ARAP; Neurite outgrowth-promoting protein; Midkine; MK; Neurite outgrowth-promoting factor 2;

Amphiregulin-associated protein; Midgestation and kidney protein; NEGF2

## **Application Instructions**

Application table	Application	Dilution
	ELISA	Direct: 0.25 - 1.0 μg/ml Sandwich: 0.25 - 1.0 μg/ml with ARG56703 as a capture antibody
	WB	0.1 - 0.2 μg/ml
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

## **Properties**

Form Liquid

Purification Purified by affinity chromatography.

Buffer PBS (pH 7.2)

Concentration 1 mg/ml

Storage instruction Aliquot and store in the dark at 2-8°C. Keep protected from prolonged exposure to light. Avoid

repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be

gently mixed before use.

Note For laboratory research only, not for drug, diagnostic or other use.

#### Bioinformation

Database links GenelD: 4192 Human

Swiss-port # P21741 Human

Gene Symbol MDK

Gene Full Name midkine (neurite growth-promoting factor 2)

Background This gene encodes a member of a small family of secreted growth factors that binds heparin and

responds to retinoic acid. The encoded protein promotes cell growth, migration, and angiogenesis, in particular during tumorigenesis. This gene has been targeted as a therapeutic for a variety of different disorders. Alternatively spliced transcript variants encoding multiple isoforms have been observed.

[provided by RefSeq, Jul 2012]

Function Developmentally regulated, secreted growth factor homologous to pleiotrophin (PTN), which has

heparin binding activity. Binds anaplastic lymphoma kinase (ALK) which induces ALK activation and subsequent phosphorylation of the insulin receptor substrate (IRS1), followed by the activation of mitogen-activated protein kinase (MAPK) and PI3-kinase, and the induction of cell proliferation. Involved in neointima formation after arterial injury, possibly by mediating leukocyte recruitment. Also

involved in early fetal adrenal gland development (By similarity). [UniProt]

Calculated Mw 16 kDa
