ARG58626 anti-FGF4 antibody

Package: 50 μg Store at: -20°C

Summary

Product Description Rabbit Polyclonal antibody recognizes FGF4

Tested Reactivity Ms

Tested Application ICC/IF, WB
Host Rabbit

Clonality Polyclonal

Isotype IgG

Target Name FGF4

Species Human

Immunogen Synthetic peptide corresponding to 18 aa (C-terminus) of the Human FGF4.

Conjugation Un-conjugated

Alternate Names K-FGF; HST-1; FGF-4; Transforming protein KS3; HSTF-1; Heparin secretory-transforming protein 1;

Fibroblast growth factor 4; KFGF; HST; Heparin-binding growth factor 4; HBGF-4; HSTF1

Application Instructions

Application table	Application	Dilution
	ICC/IF	2.5 μg/ml
	WB	0.5 - 1 μg/ml
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	
Positive Control	NIH/3T3	

Properties

Form Liquid

Purification Affinity purification with immunogen.

Buffer PBS and 0.02% Sodium azide

Preservative 0.02% Sodium azide

Concentration 1 mg/ml

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed

before use.

Note For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol FGF4

Gene Full Name fibroblast growth factor 4

Background The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family

members possess broad mitogenic and cell survival activities and are involved in a variety of biological processes including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth and invasion. This gene was identified by its oncogenic transforming activity. This gene and FGF3, another oncogenic growth factor, are located closely on chromosome 11. Co-amplification of both genes was found in various kinds of human tumors. Studies on the mouse homolog suggested a function in bone morphogenesis and limb development through the sonic hedgehog (SHH) signaling

pathway. [provided by RefSeq, Jul 2008]

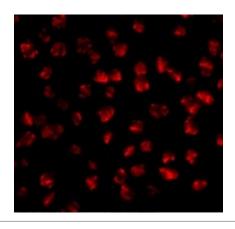

Function Plays an important role in the regulation of embryonic development, cell proliferation, and cell

differentiation. Required for normal limb and cardiac valve development during embryogenesis.

[UniProt]

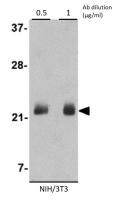

Calculated Mw 22 kDa

Images

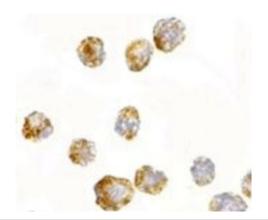

ARG58626 anti-FGF4 antibody IF image

Immunofluorescence: NIH/3T3 cells stained with ARG58626 anti-FGF4 antibody at 2.5 μ g/ml dilution.

ARG58626 anti-FGF4 antibody WB image

Western blot: NIH/3T3 cell lysate stained with ARG58626 anti-FGF4 antibody at 0.5 and 1 μ g/ml dilution.

ARG58626 anti-FGF4 antibody ICC image

Immunocytochemistry: NIH/3T3 cells stained with ARG58626 anti-FGF4 antibody at 2.5 $\mu\text{g/ml}$ dilution.
