ARG59582 anti-CRHBP antibody

Package: 100 μl Store at: -20°C

Summary

Product Description Rabbit Polyclonal antibody recognizes CRHBP

Tested Reactivity Hu, Ms, Rat

Tested Application ICC/IF, IHC-P, WB

Host Rabbit

Clonality Polyclonal

Isotype IgG

Target Name CRHBP

Species Human

Immunogen Recombinant fusion protein corresponding to aa. 25-322 of Human CRHBP (NP_001873.2).

Conjugation Un-conjugated

Alternate Names CRFBP; CRH-BP; CRF-binding protein; Corticotropin-releasing hormone-binding protein; Corticotropin-

releasing factor-binding protein; CRF-BP

Application Instructions

| Application table | Application | Dilution |
|-------------------|--|----------------|
| | ICC/IF | 1:50 - 1:200 |
| | IHC-P | 1:50 - 1:200 |
| | WB | 1:500 - 1:2000 |
| Application Note | * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist. | |
| Positive Control | Rat brain | |
| Observed Size | 37 kDa | |
| | | |

Properties

Form Liquid

Purification Affinity purified.

Buffer PBS (pH 7.3), 0.02% Sodium azide and 50% Glycerol.

Preservative 0.02% Sodium azide

Stabilizer 50% Glycerol

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.

Bioinformation

Gene Symbol CRHBP

Gene Full Name corticotropin releasing hormone binding protein

Background Corticotropin-releasing hormone is a potent stimulator of synthesis and secretion of

preopiomelanocortin-derived peptides. Although CRH concentrations in the human peripheral circulation are normally low, they increase throughout pregnancy and fall rapidly after parturition. Maternal plasma CRH probably originates from the placenta. Human plasma contains a CRH-binding protein which inactivates CRH and which may prevent inappropriate pituitary-adrenal stimulation in

pregnancy. [provided by RefSeq, Jul 2008]

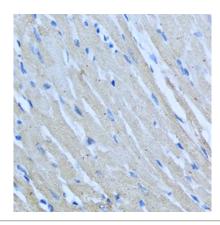

Function Binds CRF and inactivates it. May prevent inappropriate pituitary-adrenal stimulation in pregnancy.

[UniProt]

Calculated Mw 36 kDa

Cellular Localization Secreted. [UniProt]
