# ARG62893 anti-CD56 / NCAM antibody [MEM-188] (Biotin)

Package: 100 μg Store at: 4°C

## **Summary**

Product Description Biotin-conjugated Mouse Monoclonal antibody [MEM-188] recognizes CD56 / NCAM

Tested Reactivity Hu, NHuPrm

Tested Application FACS

Specificity The clone MEM-188 reacts with a 180 kDa isoform of CD56 (NCAM) expressed in leukocytes. It has

been suggested that the antibody MEM-188 could react with rhesus monkey lymphocytes. Reactivity

with other NCAM isoforms has not been tested.

HLDA VI; WS code A055 HLDA VI; WS Code NK26 HLDA VII; WS code 70077

Host Mouse

Clonality Monoclonal
Clone MEM-188

Isotype IgG2a

Target Name CD56 / NCAM

Species Human

Immunogen KG-1 human acute myelogenous leukemia cell line

Conjugation Biotin

Alternate Names CD56; NCAM; CD antigen CD56; N-CAM-1; MSK39; NCAM-1; Neural cell adhesion molecule 1

# **Application Instructions**

Application table	Application	Dilution
	FACS	2 - 5 μg/ml
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

#### **Properties**

Form Liquid

Purification Note The purified antibody is conjugated with Biotin-LC-NHS under optimum conditions. The reagent is free

of unconjugated biotin.

Buffer PBS (pH 7.4) and 15 mM Sodium azide

Preservative 15 mM Sodium azide

Concentration 1 mg/ml

Storage instruction Aliquot and store in the dark at 2-8°C. Keep protected from prolonged exposure to light. Avoid

repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be

www.arigobio.com arigo, nuts about antibodies 1/2

gently mixed before use.

Note For laboratory research only, not for drug, diagnostic or other use.

### Bioinformation

Database links <u>GeneID: 4684 Human</u>

Swiss-port # P13591 Human

Gene Symbol NCAM1

Gene Full Name neural cell adhesion molecule 1

Background CD56 (NCAM, neural cell adhesion molecule) is a transmembrane glycoprotein of immunoglobulin

family serving as adhesive molecule which is ubiquitously expressed in nervous system, usually as 120 kDa, 140 kDa or 180 kDa isoform, and it is also found on T cells and NK cells. Polysialic modification results in reduction of CD56-mediated cell adhesion and is involved in cell migration, axonal growth, pathfinding and synaptic plasticity. CD56 is a widely used neuroendocrine marker with a high sensitivity

for neuroendocrine tumours and ovarian granulosa cell tumours.

Function This protein is a cell adhesion molecule involved in neuron-neuron adhesion, neurite fasciculation,

outgrowth of neurites, etc. [UniProt]
