Bioinformation

Database links	GeneID: 112574 Human Swiss-port # Q96RF0 Human
Background	This gene encodes a member of the sorting nexin family. Members of this family contain a phox (PX) domain, which is a phosphoinositide binding domain, and are involved in intracellular trafficking. This protein does not contain a coiled coil region, like some family members, but contains a SH3 domain. Multiple transcript variants encoding different isoforms have been found for this gene. Research Area	Signaling Transduction antibody
Calculated Mw	69 kDa
