

ARG81166 Pig Albumin ELISA Kit

Package: 96 wells
Store at: 4°C

Summary

Product Description	ARG81166 Pig Albumin ELISA Kit is an Enzyme Immunoassay kit for the quantification of Pig Albumin in serum, plasma and cell culture supernatants.
Tested Reactivity	Pig
Tested Application	ELISA
Target Name	Albumin
Conjugation	HRP
Conjugation Note	Substrate: TMB and read at 450 nm
Sensitivity	1.95 ng/ml
Sample Type	Serum, plasma and cell culture supernatants.
Standard Range	1.95 - 125 ng/ml
Sample Volume	100 µl
Alternate Names	FDAH; PRO0883; PRO1341; Serum albumin; ANALBA; PRO0903

Application Instructions

Assay Time	3 hours
------------	---------

Properties

Form	96 well
Storage instruction	Store the kit at 2-8°C. Keep microplate wells sealed in a dry bag with desiccants. Do not expose test reagents to heat, sun or strong light during storage and usage. Please refer to the product user manual for detail temperatures of the components.
Note	For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Database links	GeneID: 396960 Pig Swiss-port # P08835 Pig
Gene Symbol	ALB
Gene Full Name	albumin
Background	Albumin is a soluble, monomeric protein which comprises about one-half of the blood serum protein. Albumin functions primarily as a carrier protein for steroids, fatty acids, and thyroid hormones and plays a role in stabilizing extracellular fluid volume. Albumin is a globular unglycosylated serum protein of molecular weight 65,000. Albumin is synthesized in the liver as prealbumin which has an N-terminal peptide that is removed before the nascent protein is released from the rough endoplasmic reticulum. The product, proalbumin, is in turn cleaved in the Golgi vesicles to produce the secreted

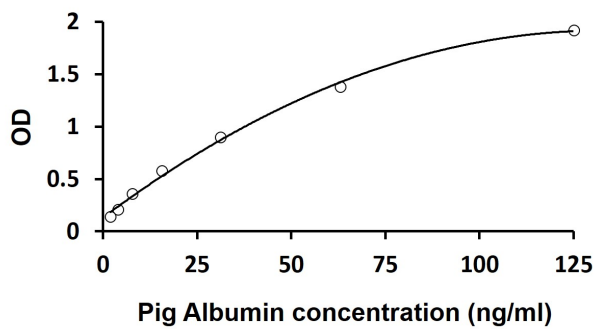

albumin. [provided by RefSeq, Jul 2008]

Function Serum albumin, the main protein of plasma, has a good binding capacity for water, Ca(2+), Na(+), K(+), fatty acids, hormones, bilirubin and drugs. Its main function is the regulation of the colloidal osmotic pressure of blood. Major zinc transporter in plasma, typically binds about 80% of all plasma zinc. [UniProt]
