

## ARG81276 Mouse FGF basic ELISA Kit

Package: 96 wells Store at: 4°C

# Summary

Product Description	ARG81276 Mouse FGF basic ELISA Kit is an Enzyme Immunoassay kit for the quantification of Mouse FGF basic in serum, plasma or cell culture supernatants.
Tested Reactivity	Ms
Tested Application	ELISA
Target Name	FGF basic
Conjugation	HRP
Conjugation Note	Substrate: TMB and read at 450 nm.
Sensitivity	23 pg/ml
Sample Type	Serum, plasma or cell culture supernatants.
Standard Range	46.875 - 3000 pg/ml
Sample Volume	100 µl
Alternate Names	FGF-2; Fibroblast growth factor 2; bFGF; FGFB; Heparin-binding growth factor 2; BFGF; HBGF-2; Basic fibroblast growth factor

#### **Application Instructions**

Assay Time

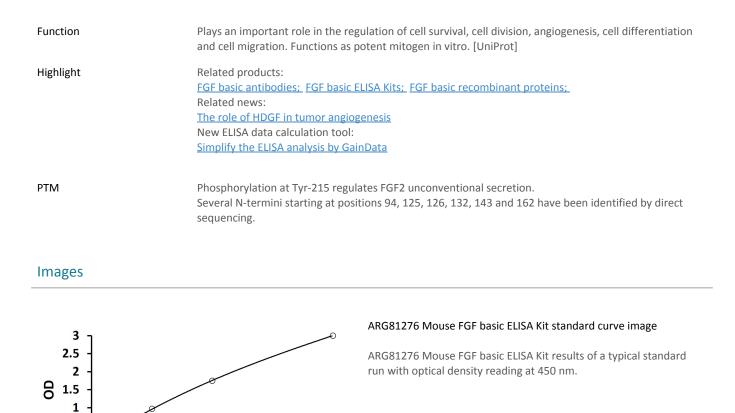

~ 3.5 hours

## Properties

Form	96 well
Storage instruction	Store the kit at 2-8°C. Keep microplate wells sealed in a dry bag with desiccants. Do not expose test reagents to heat, sun or strong light during storage and usage. Please refer to the product user manual for detail temperatures of the components.
Note	For laboratory research only, not for drug, diagnostic or other use.

### **Bioinformation**

Gene Symbol	Fgf2
Gene Full Name	fibroblast growth factor 2
Background	The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family members bind heparin and possess broad mitogenic and angiogenic activities. This protein has been implicated in diverse biological processes, such as limb and nervous system development, wound healing, and tumor growth. The mRNA for this gene contains multiple polyadenylation sites, and is alternatively translated from non-AUG (CUG) and AUG initiation codons, resulting in five different isoforms with distinct properties. The CUG-initiated isoforms are localized in the nucleus and are responsible for the intracrine effect, whereas, the AUG-initiated form is mostly cytosolic and is responsible for the paracrine and autocrine effects of this FGF.
