

## ARG83108 CHO Residual DNA Detection Kit

Package: 100 tests  
Store at: -20°C

### Summary

Product Description	<p>CHO Residual DNA Detection Kit is designed for the quantitative detection of residual Chinese hamster ovary DNA content in intermediates, semi-finished products and finished products of various biological products.</p> <p>CHO Residual DNA Detection Kit adopts the principle of the Taq-man probe to quantitatively detect CHO residual DNA in samples. The kit is a rapid, specific and reliable device, with the minimum detection limit reaching fg level.</p>
Tested Application	FuncSt
Target Name	CHO Residual DNA
Sensitivity	3 fg/ $\mu$ L
Standard Range	$3 \times 10^1 \sim 3 \times 10^5$ fg/ $\mu$ L

### Application Instructions

Assay Time	~1 hour
------------	---------

### Properties

Storage instruction	Store the kit at -20°C at all times. All reagents must be kept on ice during the entire experiment.
Note	For laboratory research only, not for drug, diagnostic or other use.

### Bioinformation

Highlight

ARG83108 CHO Residual DNA Detection Kit Standard curve

ARG83108 CHO Residual DNA Detection Kit results of standard run after 40 cycle
