

ARG83109 Vero Residual DNA Detection Kit

Package: 100 tests
Store at: -20°C

Summary

| | |
|---------------------|---|
| Product Description | Vero Residual DNA Detection Kit is designed for the quantitative detection of residual Vero host cell DNA in intermediates, semi-finished products and finished products of various biological products. Vero Residual DNA Detection Kit adopts the principle of Taq-man probe to quantitatively detect residual Vero DNA in samples. The kit is a rapid, specific and reliable device, with the minimum detection limit reaching fg level. |
| Tested Application | FuncSt |
| Target Name | Vero Residual DNA |
| Sensitivity | 3 fg/ μ L |
| Standard Range | $3 \times 10^1 \sim 3 \times 10^5$ fg/ μ L |

Application Instructions

Assay Time ~1 hour

Properties

Storage instruction Store the kit at -20°C at all times. All reagents must be kept on ice during the entire experiment.

Note For laboratory research only, not for drug, diagnostic or other use.
